

The Intra-consortium makes the staff life easier. This CAENTI intranet provides useful information and tools that help the members and the network in efficiently working.

The Intra-consortium has been managed by the University of Franche-Comté (France) since March 1<sup>st</sup>, 2006.

Home page with "What's new?" and "Calendar" functionalities

Documentary base

## GOALS

The objective of the Intra-consortium is to provide an extranet (a private intranet over the Internet) to the CAENTI, to give access to **internet services to the participants** and to assist the internal communication and the consortium management.

The intranet will:

- help the staff in connecting to the right people
- help the staff in understanding the whole organisation
- be consistently accurate and useful
- save members' time

## PRINCIPLES

In order to achieve the above goals, the WP3 team will:

- publish content and tools that clearly add value
- keep the site up-to-date
- make its use as easy as possible

## TOOLS

The Intra-consortium offers:

- ➔ an informative home page including "**what's new?**"
- ➔ a **documentary base** with all reference documents
- ➔ an improved participants **address book** available to be updated or looked up from anywhere. And it is possible to share address book contact information with others or to link contacts to calendar events.
- ➔ a powerful **group calendar** with meeting request system
- ➔ a searchable **knowledge base**
- ➔ a **wiki** that is an effective tool for mass collaborative writing.

... and many more useful resources

## NEXT STEP

Next, WP3 will deliver new tools for the project and the translation management

## THEN

Soon, the WP3 team will launch a Single sign-on (SSO) project that will enable you authenticating once and gaining access to the resources of all the software systems.

## GET INTO IT!
